Holiday retail sales in 2017 are expected to rise 4.2% above last year, which would be the strongest growth rate since 2014. Sales during the holiday season are the preeminent revenue generator for most retailers, but holiday sales in recent years have seen varying levels of strength. This year, consumer spending continues to be supported by elevated levels of confidence and solid gains in employment, real disposable income, and household net worth.

For example, propylene GDP elasticity, represented by the gray bars in Figure 2, is sustained at 1.5 or higher. This means that global propylene demand has been growing at a rate of 1.5 times global GDP growth in the period from 2000 to 2017. IHS Markit is also forecasting this growth level will be sustained from 2018 through 2025.
