ACDelco Spark Plug R44T | O'Reilly Auto Parts

Looks like all spark plug manufacturers does not follow the same convention. Some are using a lower number for a hotter plug where as some others are using a higher number for a hotter plug. I am going to to stick with AC Delco and I would like to understand how their heat range numbering system works. Their site does not say much on this topic

Reading AC Delco spark plug heat range. - Hot Rod Forum ...

Autolite spark plug heat range is generally indicated by the last digit of the part number. Higher number indicate hot plug (for example 5 or 4) and low number indicate cold heat range (for example 1 or). Spark plug heat range is the measure of how fast the spark plug tip dissipates combustion heat.

Spark Plug Cross Reference HEAT RANGE CHART

Denso Iridium Power plugs feature the heat range at the end of the part number. For example, IK20 has a heat range of 20. Denso plugs get colder the higher the number, hotter the lower the number. Starting with part # IK20 (heat range 20), a colder plug would be # IK22, a hotter plug would be # IK16.

How Do I Find a Colder or Hotter Plug? - Spark Plug
