7.1 Dynamic Equilibrium. No change in macroscopic properties – color, pH, concentration.... In the dynamic equilibrium, the concentration of the products and reactants remains constant although the reaction never goes to completion. It is because the rate of the forward reaction equals the rate of the reverse reaction.

## **Chemistry Review Activities - ScienceGeek.net**

When you study chemistry, you should not view this as some type of a chore that the school system is forcing you through. There are people who would've done anything 100 years ago to get the answers that are in your chemistry book today or that you can learn from your chemistry teacher or that you can learn from a Khan Academy video.

## **Introduction to chemistry (video) | Khan Academy**

Learn about the fundamental concepts of chemistry including structure and states of matter, intermolecular forces, and reactions. You'll do hands-on lab investigations and use chemical calculations to solve problems.

In Figure 2.7.1, selenium lies above and to the right of the diagonal line marking the boundary between metals and nonmetals, so it should be a nonmetal. Note, however, that because selenium is close to the metal-nonmetal dividing line, it would not be surprising if selenium were similar to a semimetal in some of its properties.
