Attach the clear tubing to the funnel and make sure it's a snug fit. Drop the end of the tubing down to the fill hole. Slide the end of the tube into the fill bolt hole and make sure it isn't too loose, so it won't come out while filling. Pour each bottle of Honda Manual Transmission Fluid down the funnel. A little excess fluid will leak out because the car takes 1.9 quarts and each bottle is one quart.

The fill plug on the manual transmission is located on the very front of the transmission on the driver side. The fill plug will be about halfway up the transmission and is a 17mm bolt head. If the Eclipse has an automatic transmission, you can add the transmission fluid through the dipstick tube that is located on the rear passenger side of the engine. Just take the dipstick out, add the funnel and start pouring in the automatic transmission fluid. Most all Mitsubishi Eclipse Models come ...

### **How Do You Put Transmission Fluid in an Eclipse ...**

Most of the time, the level of a manual transmission is checked by placing your finger into the filler plug hole and seeing if you get some fluid onto the end of your finger. If you don't, then the fluid is low. If there is fluid at that level, then no additional fluid is needed. Step 7: Add the transmission fluid. Using the fluid pump, add fluid into the transmission through the filler plug.

### **How to Check Manual Transmission Fluid | YourMechanic Advice**

You haven't told us what car you have, year, make, model. But some manual transmission have two bolts that you remove. Actually three if you count the drain bolt. The two fill bolts are apart lengthwise but one is slightly lower than the other. You remove both and fill from the top until the gear oil or ATF comes out the lower hole.
