Active Fire Data. There are two major types of current fire information: fire perimeter and hot spot data: Fire perimeter data are generally collected by a combination of aerial sensors and on-the-ground information. These data are used to make highly accurate perimeter maps for firefighters and other emergency personnel, but are generally updated only once every 12 hours.

Fire Emblem: Souls of the Forest is a gameplay focused hack made with FEBuilder that I've been developing since around late 2017, and now I feel like it's a good time to make a public release. I've done changes on this project which I feel modify the vanilla FE gameplay to give the game it's own unique, yet not cluttered, experience.
