Re: E3800 Policy Based Routing. Hello, I am pretty sure you can with the 3800. Check the advanced traffic management guide for your switch and it should have some info in PBR using traffic classification and policies. Also note that PBR was introduced in a certain version, so you if you don't have the PBR option when creating a policy to use the traffic classifier you will most likely need to upgrade.

supports HP Intelligent Management Center (IMC) bring your own device (BYOD) solution Quality of Service (QoS) Advanced classifier-based QoS classifies traffic using multiple match criteria based on Layer 2, 3, and 4 information; applies QoS policies such as setting priority level and rate limit to selected traffic on a per-port or per-VLAN basis

### HP 3800 Switch Series

However if you only cable switch one and it fails, switch two picks up all the traffic routing without downtime. The kicker though is HP makes you buy their config management software to control the switch, without it after the eval period you can not configure VLAN's etc any more effectly making it a dumb virtual switch.

### HP Procurve 3800

NOTE: It is highly recommended that you create a mesh topology for maximum throughput and resiliency of the stack. At a minimum, a ring topology should be created. A chain topology is not recommended because any hardware or software failure in the stack results in lost ports, which increases the amount of time for the recovery of full stack operation due to multiple reboots.
