Sections 19.101 and 102 of IEC 61558-2-16 require FIW to comply with IEC 60851-5 and IEC 60317-0-7. Nominal diameters and test voltages are defined in table 111 of IEC 61558-2-16. If peak working voltage exceeds 750 Vpk, then a partial discharge test is additionally required as indicated in section 18.102 of IEC 61558-2-16.

ST control transformers are constructed fully according to IEC/EN 61558 guidelines, with advantages including the possibility to select between earthed or unearthed operation, preventing low voltage drop in the case of switching inductive loads, possibility to correct main voltage by means of tapping, dampening of wire line interferences of the mains circuit, limitation of short-circuit current in the control circuit, and simpler voltage and insulation testing.
