The target-centric approach to intelligence is a method of intelligence analysis that Robert M. Clark introduced in his book "Intelligence Analysis: A Target-Centric Approach" in 2003 to offer an alternative methodology to the traditional intelligence cycle. Its goal is to redefine the intelligence process in such a way that all of the parts of the intelligence cycle come together as a network.

Intelligence cycle (target-centric approach) - Wikipedia

Evaluate and depict behavioral, physical, or functional relationship links between network nodes. Research and analyze a given threat actor then construct a target centric analysis of the target actor's network and patterns-of-life.
