(Redirected from ISO 14644-4) ISO 14644 Standards were first formed from the US Federal Standard 209E Airborne Particulate Cleanliness Classes in Cleanrooms and Clean Zones. The need for a single standard for cleanroom classification and testing was long felt.

ISO 14644

This part of ISO 14644 is one of a series of standards concerned with cleanrooms and associated subjects. Many factors besides design, construction and start-up should be considered in the operation and control of cleanrooms and other controlled environments. These are covered in some detail in other International Standards prepared by ISO/TC 209.

ISO 14644-4 : Cleanrooms and associated controlled ...

ISO 14644-4 specifies the requirements for the design and construction of the cleanroom facilities (to be referred to as

clean installations), but does not prescribe specific technological nor contractual means to meet the requirements.

ISO 14644-4 : 2001(R2016)

Cleanrooms and associated controlled environments -- Part 4: Design, construction and start-up This part of ISO 14644 specifies requirements for the design and construction of cleanroom installations but does not prescribe specific technological or contractual means to meet these requirements.

ISO 14644-4:2001

ISO 14644-4 :2001 and NEW 2018 2001 • Adequate space. • Specify ISO cleanliness class. • Clean construction protocol. • Avoid cracks, crevices, and uncleanable areas. • Impervious, non-shedding surfaces. • Coved junctions. • Guidance on air changes/hr for non-UDF. • Design review and testing fits with old Annex 15. 2018 new aspects

Good Cleanroom Design & Construction Practice

ISO class 3 is approximately equal to FS209E class 1, while ISO class 8 approximately equals FS209E class 100,000. By law, Federal Standard 209E can be superseded by new international standards. It is expected that 209E will be used in some industries over the next five years, but that eventually it will be replaced internationally by ISO 14644-1.
