...

JIS K-6301, 16 was followed in measuring degradation by the action of ozone. Crack Resistance. The test method of JIS K-6301 was followed. Stain Proofness. The test tire was placed on a passenger car and allowed to run at a distance of 5,000 km. Blackness of the sidewall was examined on a tester tradenamed

Refrectometer TP-200 and manufactured by Tokyo Denso Co.  
The smaller numerical figure, the more vivid the blackness.

JIS K 6259-2 - Rubber, vulcanized or thermoplastic - Determination of ozone resistance - Part 2: Determination of the ozone concentration Published by JSA on September 24, 2015

### **JSA - JIS K 6259-1 - Rubber, vulcanized or thermoplastic ...**

The presence of ozone in the atmosphere can adversely affect many rubber products causing cracking on the surface of the material. Conducting controlled, laboratory testing of material samples against industry standards can provide product manufacturers critical information needed to make formulation decisions.
