For example, when used on a full-frame (24 x 36mm imaging sensor) DSLR, a 50mm lens is considered a standard or "normal" lens. Mount the same 50mm lens on a compact camera containing a smaller, (22.3 x 14.9mm) APS-C sensor, and the image in the viewfinder now appears as if it was captured with an 80mm lens.

### Canon DSLR Lens Buying Guide | B&H Explora

One of the most important characteristics to consider when choosing your ideal DSLR is its compatible system of lenses. Lenses are, somewhat arguably, the most important tools for elevating the actual quality of imagery and can be the deciding factor between professionally rendered photographs and average snapshots.

I can definitely recommend buying used Nikon DSLR camera, Nikon DSLR cameras are strong - well build and last long, even 10-year-old Nikon can still be used for a professional photo-shoot, and the price is going down every year so you can definitely get a good deal, and the lens selection is huge.

### **Buying guide for used Nikon DSLR camera.**

Note that owners of Canon APS-C cameras, like any EOS Rebel, can use lenses designed for full-frame cameras. Owners of full-frame Canon DSLRs, like the EOS 5D IV, cannot use lenses designed for APS-C cameras. This guide does not cover lenses designed for Canon's RF-mount mirrorless cameras.

### **The best lenses for Canon DSLRs: Digital Photography Review**

The lens that typically comes with a DSLR (digital single-lens reflex) camera, the 18-55mm, can get old fast. The kit lens is very versatile, but you'll soon realize that it can't do everything you want it to do. Unfortunately, there is no one-size-fits-all type of lens on the market, so picking out your next lens might be difficult.

### **Camera Lens Buying Guide: What DSLR Lens Is Best for You ...**

Macro zoom lenses are among the most versatile for DSLR cameras, with a wide range typically around 40-200mm. At 70-300mm, this Tamron lens is ideal for handheld shooting, particularly nature, wildlife, sports, and portraits. Like any macro lens, images will come back sharp and highly focused—almost too focused, if there is such a thing.
