Neuroscience And Legal Responsibility Oxford

Science and law have been locked in a dialogue on the nature of human agency ever since the 13th century when a mental element was added to the criteria for legal responsibility. The rich story told by the authors in this volume testifies that far from ending this dialogue, neuroscience, psychology and behavioural genetics have the potential to further enrich and extend this dialogue.

Neuroscience and Legal Responsibility - Oxford Scholarship

Neuroscience and Legal Responsibility Edited by Nicole A Vincent Oxford Series in Neuroscience, Law, and Philosophy. Provides a thoroughly compatibilist approach to integrating recent findings as well as techniques and technologies derived from the mind sciences into legal responsibility adjudication rather than just moral responsibility

This chapter presents eight cases to frame and discuss the question of how neuroscience, in the form of neuroimaging, can inform evaluations of people's actions in the criminal law realm. The discussion supports the view that neuroscience can inform but not determine judgments of criminal responsibility.
