558 SOLUTIONS TO SELECTED

EXERCISES 1.11. Define $f: \mathbb{N} \rightarrow \mathbb{N}$ such
that $f(n) = \lfloor \sqrt{n} \rfloor$. Then f is one-to-one and
onto, so \mathbb{N} is countable. 1.13. Let a, b, c, d
be positive integers. If $a^2 + b^2 = c^2 + d^2$, then
 $(a^2 + b^2) / (c^2 + d^2)$ is a nonzero rational number and
 $(a^2 + b^2) / (c^2 + d^2) = 1$. It follows that

Access PDF Solutions To Selected Exercises From Jehle And Reny 2001

both d/y and d/q are rational numbers, and therefore y and d must be rational numbers. 1.14. Let g and f be functions from \mathbb{R}^2 to \mathbb{R}^2 .
