### Tesla And The Aether Infinite

Tesla had long hoped to be able to distribute electric power globally through the medium of the aether, power generated at the transmission point with benign and unlimited sources such as hydroelectric power.

### Tesla and the Aether - Infinite Energy

Tesla's ether was rigidified by rapidly varying electrostatic forces, and was thereby involved in gravitational effects, inertia, and momentum, especially in the space near earth, since, as explained by Tesla, the earth is "...like a charged metal ball moving through space", which creates the enormous, rapidly varying electrostatic forces which diminish in intensity with the square of the distance from earth, just like gravity.

### Dynamic Theory of Gravity by Nikola Tesla | Aether Force

Tesla said that the ether is acted upon by the life-giving creative force. The ether is thrown into "infinitesimal whirls" ("micro helices") at near the speed of light, becoming ponderable matter.

He could cause planes to collide and produce his suns and stars, his heat and light. He could originate and develop life in all its infinite forms...[Such powers] would place him beside his creator, make him fulfill his ultimate destiny. [16] We see that Tesla is asking a question, speculating, searching for an answer.

### Aether (Akasha), Vedic Philosophy & Nicola Tesla - by Toby ...

Most likely there will be no generalized wireless transmission of power, but there will be free energy tapped from the vacuum state— the aether— at countless distributed sites with compact free energy devices. Thus, the inevitable end of the power-grid— just as Tesla had envisioned.

### Nikola Tesla— Man of Three Centuries - Infinite Energy

Tesla possessed a broader vision of the cosmos because his keen sense of awareness and especially his natural intuitive insights gave him a deeper understanding of the role that the ether (or aether) played in the manifestations of all electrical phenomena while his contemporaries focused their attention exclusively on the electromagnetic component (assuming that no other component could be involved). This lack of etheric insight by his contemporaries (with the exception of Sir William ...

### Radiant Energy:Unraveling Tesla's Greatest Secret by Ken ...

Of course, if light is a wave, there must be a "medium" for light to vibrate. That medium is "ether," which is commonly spelled "aether," a substance which fills the Universe. Nikola Tesla was a big supporter of ether. Much of Tesla's research assumed the existence of ether.

### Tesla Physics

There are a lot of articles on the net that mention Nikola Tesla's ether (aether) theories, such as this quote: Only the existence of a field of force can account for the motions of the bodies as observed, and its assumption dispenses with space curvature. All literature on this subject is futile and destined to oblivion.

### Why did Tesla say that 3,6,9 was the key to the universe ...

However, another idea which Tesla discussed was abandoned by modern physicists, and that was the concept of the all pervasive ether. This led to a number of key differences between Tesla's view of the world as compared to that of Albert Einstein (1879-1955). Tesla disagreed with the findings of Einstein's Theory of Relativity in a number of ways.
