Kenwood is known for making robust devices with great build quality but the TS-590SG seems to be one of their better products even by that standard. You would be surprised to know that the Texas Instruments processor Kenwood has installed in the TS-590SG is exactly what's used in the Icom-7600, which is priced about \$3,000.

The TS-590SG is an excellent value, high performance radio. Sometimes I regret selling my my TS-590, even though I own the new TS-890. It was that good. Solid feel, reliable service, a joy to operate. Excellent receiver with pleasant audio - not as harsh as my older radios, and very clear and intelligible.

The Kenwood TS-590SG... a great value in an HF transceiver! Perhaps you're thinking you might opt for a 590SG yourself. It should be noted that this page is purposely aimed at ham's desiring to utilize their 590 for virtual audio handling as described elsewhere on this website by clicking Digital audio for the Kenwood 590SG.

The enhanced Kenwood® TS-590SG improves on the already highly acclaimed TS-590S to provide affordable, high performance, 100 watt, amateur operation on the HF and 6 meter bands.

**Kenwood TS-590SG, Kenwood TS590SG - Universal Radio**  
Over all the Kenwood TS-590SG is a great radio, and the automatic beat cancel is a nice improvement over my other ham radios. The only negative I have found is the built in automatic antenna tuner is not as good as the automatic antenna tuner that came with the Kenwood TS-450sat and Kenwood TS-850sat.
