Urban Economics

Urban economics is broadly the economic study of urban areas; as such, it involves using the tools of economics to analyze urban issues such as crime, education, public transit, housing, and local government finance. More specifically, it is a branch of microeconomics that studies urban spatial structure and the location of households and firms. Much urban economic analysis relies on a particular model of urban spatial structure, the monocentric city model pioneered in the 1960s by William Alonso

Modern urban land use theory, which forms the core of urban economics, is essentially a revival of von Thünen's theory (1826) of agricultural land use. Despite its monumental contribution to scientific thought, von Thünen's theory languished for more than a century without attracting the widespread attention of economists.
